

<NSObject>

<MQTTPersistence>

MQTTCoreDataPersistence

```
classDiagram
    class NSObject
    class MQTTPersistence
    class MQTTCoreDataPersistence
    NSObject <|-- MQTTCoreDataPersistence
    MQTTPersistence <|-- MQTTCoreDataPersistence
```

The diagram illustrates a class hierarchy. At the top, two boxes represent the parent classes: <NSObject> on the left and <MQTTPersistence> on the right. Below these, a third box represents the child class, MQTTCoreDataPersistence. A horizontal line connects the two parent boxes, with a vertical line extending downwards from its center to the top of the child box. From this vertical line, two arrows point upwards: one to the bottom of the <NSObject> box and another to the bottom of the <MQTTPersistence> box, indicating that MQTTCoreDataPersistence inherits from both parent classes.
